Res. No. 279

Resolution calling upon the Metropolitan Transportation Authority to conduct a pilot program involving the installation of structures on subway steps designed to facilitate movement of bicycles.

By Council Member Menchaca

Whereas, Bicycles are permitted on the subway, but most stations do not have elevators; and

Whereas, Carrying a bicycle up and down the stairs in the subway system can be difficult and unwieldy at best and impossible for some people; and

Whereas, Other cities, including San Francisco, Copenhagen, and Seoul, have installed narrow bicycle ramps along the sides of stairways in their public transportation systems to facilitate the movement of bicycles; and

Whereas, The San Francisco ramps cost approximately \$100,000 per stairway; and

Whereas, The ramps are situated mostly under handrails in space not otherwise used by individuals using the stairway; and

File #: Res 0279-2018, Version: *

Whereas, Ramps also alleviate the obstruction, bottlenecks, and potential hazards that can be caused by

customers lugging their bicycles up and down subway stairs; and

Whereas, Cycling is an environmentally-friendly and healthy transportation alternative; and

Whereas, New York City has undertaken numerous measures to encourage cycling, most notably

expanding its bicycle lane network and introducing a bicycle-share system; and

Whereas, Narrow bicycle ramps on subway stairs would be an unobtrusive and relatively inexpensive

method of continuing to make New York a bicycle-friendly city; now, therefore, be it

Resolved, That the Council of the City of New York calls upon the Metropolitan Transportation

Authority to conduct a pilot program involving the installation of structures on subway steps designed to

facilitate movement of bicycles.
