Department of Education Budget Overview

The Preliminary Financial Plan for Fiscal 2025-2029 (Preliminary Plan), includes a proposed Fiscal 2026 budget of \$33.5 billion for the Department of Education (DOE or the Department). The Department's projected Fiscal 2026 budget represents 29.3 percent of the City's proposed Fiscal 2026 budget in the Preliminary Plan. DOE's Fiscal 2026 budget in the Preliminary Plan is \$151.1 million (0.5 percent) greater than its \$33.3 billion Fiscal 2026 budget in the November Financial Plan. The Fiscal 2026 Preliminary Budget is \$816.6 million greater than the Fiscal 2025 Adopted Budget.

DOE Budget
by Funding
Source

Source: New York City Office of Management and Budget

The Department of Education budget includes City, State, Federal, Intra-City and other Categorical funding. In Fiscal 2025, Intra-City and Other Categorical funding comprised less than 1 percent of DOE’s funding sources. In Fiscal 2026, Intra-City and Other Categorical funding comprise 1 percent of DOE’s funding sources.

City Funding. City tax levy funds approximately 53 percent (\$17.7 billion) of DOE’s Fiscal 2026 budget in the Preliminary Plan. DOE’s Fiscal 2026 budget includes \$921 million more in City funding than in the Fiscal 2025 Adopted Budget. The increase is primarily driven by collective bargaining contracts, primarily for the United Federation of Teachers (UFT) and Council of School Supervisors and Administrators (CSA), as well as greater spending for charter schools and Carter Cases.

State Funding. State funding accounts for approximately 40 percent (\$13.5 billion) of DOE’s Fiscal 2026 budget in the Preliminary Plan, \$3 million less than the amount of State funding recognized in the Fiscal 2025 Adopted Budget. State funding is primarily made up of Foundation Aid, which accounts for 73 percent of State funding in DOE’s Fiscal 2026 Preliminary budget. The Preliminary Plan includes \$588 million less Foundation Aid than what was proposed in the State’s Fiscal 2026 Executive Budget for school aid to New York City. Further discussion on State funding can be found in the Federal and State budget risks section.

Federal Funding. Federal funding accounts for approximately six percent (\$2.1 billion) of DOE’s Fiscal 2026 budget in the Preliminary Plan, \$100 million less than the amount of federal funding recognized in the Fiscal 2025 Adopted Budget. The difference is due to the expiration of the last \$212 million in American Rescue Plan funding at the end of Fiscal 2025. Further discussion on federal funding can be found in the Federal and State budget risks section.

Over the past five fiscal years, as federal stimulus funds have been expended, City tax levy has disproportionately been used to replace the cost of programs previously covered by federal funding, in addition to covering larger shares of programs like Pre-K over time. The chart below presents the change since Fiscal 2022 of City, State and Federal funding as a share of DOE’s overall budget. The Fiscal 2022 to Fiscal 2024 show numbers as of their Adopted Plans and the Fiscal 2025 and Fiscal 2026 numbers are of the Preliminary Plan. The chart demonstrates the decline in federal funding and the increase in City funding over the last few years and in the early years of the Financial Plan period.

Funding Sources Share of DOE Budget, Fiscal 2022-2026.

(423)**

Budgeted and Actual Pedagogical Headcount FY19-FY29

Note: Budgeted and actual headcounts are as of the end of the fiscal year, except for FY26 where budgeted headcount

Budgeted and Actual Non-Pedagogical Headcount FY19-FY29

The DOE's current Fiscal 2025 full-time budgeted headcount is 138,098: 125,188 pedagogical positions and 12,910 for non-pedagogical positions. As the non-pedagogical chart shows, budgeted headcount has been decreasing since Fiscal 2022 while actual headcount has actually increased and is now above the budgeted level.

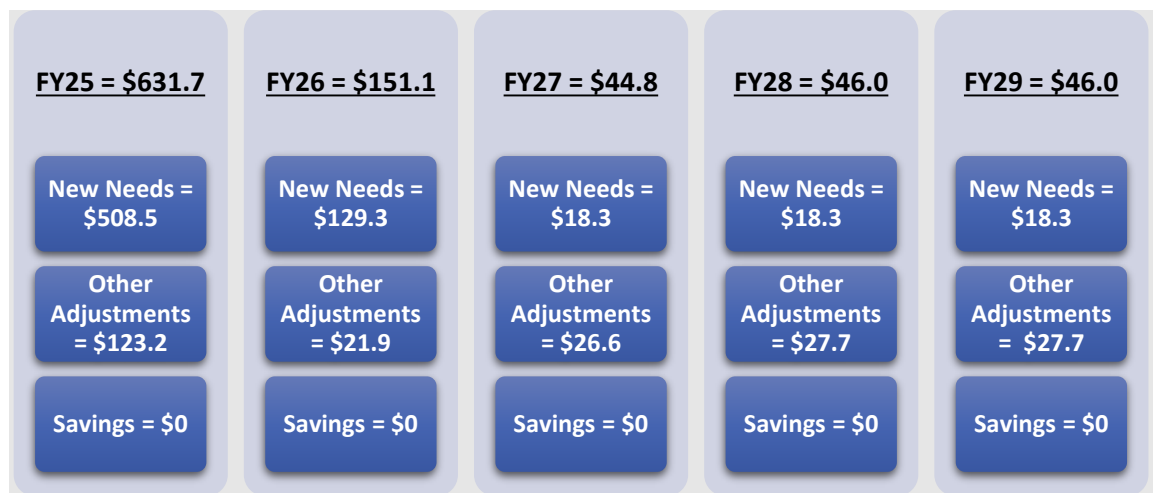

For Pedagogical positions, in Fiscal 2022 the DOE had over 10,000 vacancies or an 8.5 percent vacancy rate, the largest vacancy rate among teaching and other pedagogical positions in recent history. The number of pedagogical vacancies has decreased since then, as a result of both the decrease in the budgeted headcount and an increase in the active headcount. The DOE currently has 5,263 pedagogical vacancies in Fiscal 2025.

The table below shows the pedagogical headcount broken down by area. The vacancy rates among pedagogical positions in general education and special education are low. Vacancies are high among Early Childhood Education (ECE) positions and are very high in Categorical programs. However, that unit of appropriation funds a variety of services for students largely funded by federal and state dollars and has not had a budgeted headcount realignment since the federal stimulus funding lapsed from the budget in Fiscal 2024.

Pedagogical Headcount By Area

Area	Fiscal 2025 Budget	Fiscal 2025 Actual	Vacancy Rate
Categorical Programs	7,162	3,546	51%
Early Childhood Education	8,024	6,826	15%
General Education	60,098	60,858	(1%)
School Support and Other	1,383	1,655	(20%)
Special Education	48,521	47,040	3%

Preliminary Plan Changes

Dollars in Millions

FY26 Changes in Preliminary Plan:

Total: \$151.1 million

New Needs: \$129.3 million

Other Adjustments: \$21.9 million

Significant Preliminary Plan Changes

New Needs

- Carter Cases.** The Preliminary Plan includes an additional \$275 million in Fiscal 2025 for Carter Cases. This brings the Fiscal 2025 budget to \$1.1 billion for Carter Cases which includes tuition payments, mandated services vouchers, legal expenses and other funding for due process claims. In the November Plan, \$159 million was added for Carter Cases to cover direct education services. The funding added in the Preliminary Plan is for payments and contracts.
- Charter Schools.** The Preliminary Plan includes an additional \$87 million for Charter Schools in Fiscal 2025. This is a City funding adjustment coupled with recognizing increased State revenue, to account for the increase in charter school enrollment, lease costs, and tuition rate increases. Given that State mandated tuition rates have been increasing and lease costs

for existing sites continue to increase, more funding will likely need to be added for Fiscal 2025 and the outyears in future plans.

- **Nurses.** The Preliminary Plan includes an additional \$192 million for contract nurses in Fiscal 2025 only. This additional funding will cover costs for contract nurses who work with special education students in a one-to-one ratio as well as contracted nurses who work in a school building, as at least one nurse is required in each school. Funding for school nurses is shared between DOE and the Department of Health and Mental Hygiene. The Fiscal 2025 budget currently includes \$229 million for contract nurses, but only \$35.6 million in Fiscal 2026 and the outyears.
- **Summer Rising.** The Preliminary Plan includes an additional \$80 million in Fiscal 2026 for Summer Rising programming. The \$80 million was originally funded in Fiscal 2024 with lapsing federal stimulus dollars and replaced with City dollars in Fiscal 2025 but was not baselined. This funding is intended to keep programming at the same level as Fiscal 2025. The Preliminary Plan includes the \$80 million for Summer Rising in Fiscal 2026 but does not include funding for Summer Rising in the outyears.
- **Pathways Expansion.** The Plan includes an additional \$17.5 million in baselined City funding starting in Fiscal 2026 for the expansion of the Pathways program. This addition brings the total budget for the program to \$70.5 million. There was \$53 million in baselined State funding added in the Fiscal 2025 Executive Plan.
- **Learning to Work.** The Preliminary Plan includes an additional \$31 million in City funding added in Fiscal 2026 only. The additional funding is intended to maintain the same level of programming and services for Fiscal 2026 as is currently provided in Fiscal 2025.
- **Schoolyards to Playgrounds.** The Plan includes an additional \$770,000 baselined beginning in Fiscal 2026 for the Schoolyard to Playgrounds program. These funds will expand the program to include an additional 11 schoolyards to be open after school and on weekends. This funding will be used to pay custodial staff working additional hours to keep schoolyards open in addition to regular hours.

Other Adjustments

- **Day Care Council of New York (DCCNY) Funding.** The Fiscal 2026 Preliminary Plan includes an additional \$21 million in Fiscal 2025, \$20 million in Fiscal 2026, \$25.2 million in Fiscal 2027 and \$26.4 million in both Fiscal 2028 and 2029. This funding is to support the wage increases for childcare providers in New York City through a contract deal between DCCNY, Local 205 and Local 95. This funding increases payments to CBOs for these wage increases.
- **Agency Nurse Tracking System (ANTS).** The Preliminary Plan includes an additional \$31.7 million dollars in intra-city funding in Fiscal 2025 for ANTS. This additional funding is only included in Fiscal 2025. This funding is associated with the contract with DOHMH to provide nurses in schools.
- **Early Childhood Education Outreach Transfer to Department of Health and Mental Hygiene (DOHMH).** The Plan includes a transfer of \$72,000 in Fiscal 2025 to DOHMH to conduct outreach for Early Childhood Education seats using DOHMH data on parents with children in the age 0 to 5 population. Combined with the \$1 million transferred in the November Plan, \$1.072 million out of the \$5 million funded in the Fiscal 2025 Adopted Plan has been moved to DOHMH for outreach.

	<ul style="list-style-type: none"> • Collective Bargaining: Doctors Council. The Preliminary Plan includes an additional \$249,000 in Fiscal 2025 and an additional \$290,000 in the outyears for the costs of collective bargaining agreements for staff represented by the Doctors Council. • Collective Bargaining: Local 638 Steamfitters. The Plan includes an additional \$735,000 in Fiscal 2025, \$785,000 in Fiscal 2026, and \$1 million in Fiscal 2027 through 2029 the costs of collective bargaining agreements for staff represented by Local 638 Steamfitters.
Preliminary Mayor's Management Report	<p>The Preliminary Mayor's Management Report (PMMR) for Fiscal 2025 reports on 4 service areas and 16 goals for the Department of Education. Noteworthy metrics that were reported are detailed below. Notably, many of the performance indicators included in the PMMR do not have data for Fiscal 2025 and therefore do not offer any new insights since the release of the Fiscal 2024 MMR.</p> <ul style="list-style-type: none"> • School-Age Special Education Enrollment – The PMMR indicates a slight increase in the number of students with IEPs, from 263,259 in the Fiscal 2024 4-month-actual to 273,231 students during the same period in Fiscal 2025. This includes an associated increase in students with IEPs enrolled at New York City Public Schools from 182,319 in the first four months of Fiscal 2024 to 187,655 during the same period in Fiscal 2025. If this trend continues, it would be the second straight year that special education enrollment has increased in New York City Public Schools. While this increase could be seen as a positive sign that more students with IEPs are remaining in New York City Public Schools that claim is somewhat refuted by the fact that the percent of all students with disabilities enrolled in non-public schools, including charter schools has increased from 28 to 31 percent between Fiscals 2020 and 2024, according to data from the Fiscal 2024 Mayor's Management Report. • Preschool Special Education enrollment – The PMMR for Fiscal 2025 includes new metrics for preschool special education enrollment across public schools, charter schools, non-public schools and contracted Early Childhood Education sites. Preschool special education enrollment has increased over the past three years. In Fiscal 2022, there were 25,935 special education preschool students while in Fiscal 2024 there were 31,542. This increase is in line with Department testimony that outlines the increasing number of preschool aged students who need a special education seat or services. The Fiscal 2025 4-month-actual of 22,470 preschool special education students is similar to the Fiscal 2024 4-month-actual of 22,139 students. Since this number only includes data through October 2024, it is understood that there will be an increase by the end of the school year as more students receive evaluations, including the larger influx in January. • Early Childhood Education – Metrics for Early Childhood Education were included for the first time in the Fiscal 2024 MMR. The metrics allow for a preliminary glance at ECE enrollment and vacancy data, however, while the PMMR includes four-month-actual data for Fiscal 2025, there is no Fiscal 2024 four-month-actual data for comparison. During the first four months of Fiscal 2025 5,328 students were enrolled in infant and toddler programming, 40,925 were enrolled in 3-K programming, and 53,930 were enrolled in Pre-K. The Fiscal 2024 actual enrollment for infant and toddler programming was 10,441, actual 3-K enrollment was 43,957, and actual pre-K enrollment was 59,250. These enrollment figures were paired with vacancy rates in each program. During the first four months of Fiscal 2025 there were 5,440 vacant infant and toddler seats while the Fiscal 2024 actual vacancy was 438 seats. In the first four months of Fiscal 2025 there were 6,761 vacant 3-K

seats while the actual Fiscal 2024 vacancy was 8,446 seats. The Fiscal 2025 four-month-actual shows 17,719 unfilled Pre-K seats while the Fiscal 2024 actual was 14,008 unfilled seats. For more analysis, see the ECE Enrollment and Vacancy Rates section of Budget Issues and Concerns.

- **Class Size** – Metrics for class size were changed in the Fiscal 2024 MMR, now presenting class size in grade bands (K-3, 4-5, 6-8 and 9-12) instead of each grade on its own. In the Fiscal 2025 PMMR, there are signs that class sizes may be decreasing for the first time since 2020. All four grade bands show decreased class sizes in the first four months of Fiscal 2025 compared to the same period in Fiscal 2024 and all four grade bands had a higher percentage of classes at or below the Class Size Law caps.

Budget Issues and Concerns

Non-Baselined Programs. In the Fiscal 2025 Adopted plan, the Administration and the Council agreed to provide funding for most of the programs which had been funded with expiring federal stimulus dollars. However, while some programs were baselined with State funding, many programs were covered with City tax-levy for Fiscal 2025 only, leaving multiple programs at risk of funding reductions in Fiscal 2026 and beyond. Two programs, Summer Rising (\$80 million) and Learning to Work (\$31 million), were funded in the Preliminary Plan for just Fiscal 2026. There is still \$227 million in programmatic funding that has not been restored in Fiscal 2026, including \$154 million in funding for school cleaning, \$41 million in arts programming, and \$12 million for restorative justice.

Additionally, there are important programs that have been consistently funded as one-shot programs, including Mental Health Continuum (\$5 million with \$889,459 in DOE's budget), community schools (\$14 million), and School Food staffing (\$20 million). The table below includes the full list of Council priority programs that are currently funded in Fiscal 2025 but not included in Fiscal 2026 along with their current funding levels in Fiscal 2025.

Lapsed Federal Stimulus Funds covered with City Dollars	
Program	Fiscal 2025 Funding
New York City School Support Services (NYCSSS)	\$ 154,000,000
Arts Funding	41,000,000

Carter Cases. With the addition of \$275 million in Fiscal 2025 in the Preliminary Plan, the Fiscal 2025 Carter Cases budget is now \$1.07 billion. Spending in the Carter Cases budget code continues to grow. In Fiscal 2019, the DOE spent \$499 million on Carter Cases. By Fiscal 2024 this total had increased to \$1.19 billion. Based on historical spending trends, the \$943 million currently budgeted for Carter Cases in Fiscal 2026 will not be sufficient and the Administration will need to add funding in subsequent plans.

The Carter Cases budget code includes the cost of tuition payments to schools for Carter and Connor cases, direct services for students with IEPs, legal fees for due process cases, and student transportation. The increase in tuition payments and direct services are the main drivers of this spending growth. DOE testified at the special education hearing on January 30, 2025, that the number of students receiving tuition payments is relatively stable, but the schools' tuition costs are rising. Additionally, the Department testified that the number of students who need direct services, including through vouchers, is exponentially rising. The Department testified that there were only 6,000 due process cases for direct services in 2014, growing to 26,000 cases in 2024. Notably, the percentage of Office of Administrative Trials and Hearings (OATH) decisions ordering related services increased from 45 percent in 2018 to 75 percent in 2023. After disaggregating related services decisions by service type, tuition payment represents the largest portion of OATH decisions, 45 percent of cases in 2023. The chart below demonstrates the dramatic increase in spending on direct services as well as the steady increase in tuition payments.

Spending in Carter Cases Budget Code by Object Code, Fiscal 2015-2025 (\$'s in 000's)

Source: Mayor's Office of Management and Budget.

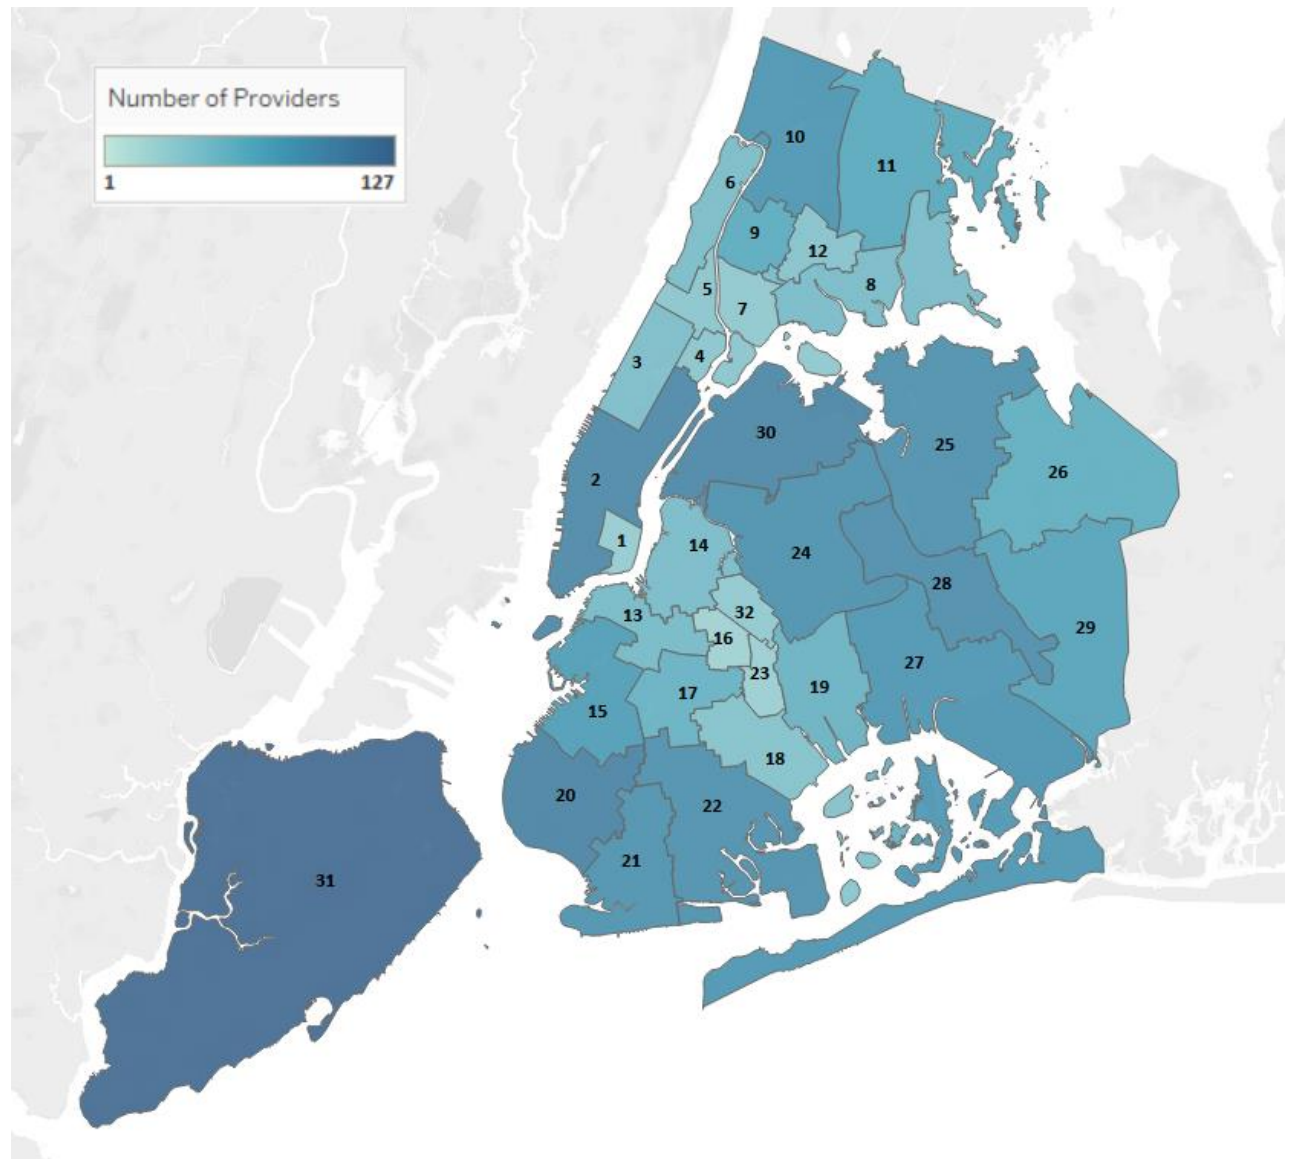

Direct education services are provided for students who are entitled to mandated services through an IEP or an Individualized Education Services Program (IESP) but filed a due process claim that the student is not receiving services within their school. Students with IEPs are enrolled in public schools while students with IESPs are enrolled in non-public settings such as religious schools. Direct services can include speech therapists, occupational therapists, and Special Education Itinerant Teachers (SEITs). In response to the rising number of students in need of direct services and direct service vouchers, \$125 million for direct services was added in the November Plan starting in Fiscal 2025 and baselined in the outyears.

Early Childhood Education (ECE). Improving the Early Childhood Education system continues to be a priority for the New York City Council. In the Fiscal 2025 Adopted Plan, \$197 million in City tax-levy was added to the Fiscal 2025 budget, including \$92 million to replace previous federal stimulus dollars for 3-K programming, \$20 million for supporting families without a 3-K offer, \$55 million for additional preschool special education seats, \$25 million for the Council's extended day pilot, and \$5 million for marketing and outreach. This funding was not baselined and additional funding was not included in the Preliminary Plan.

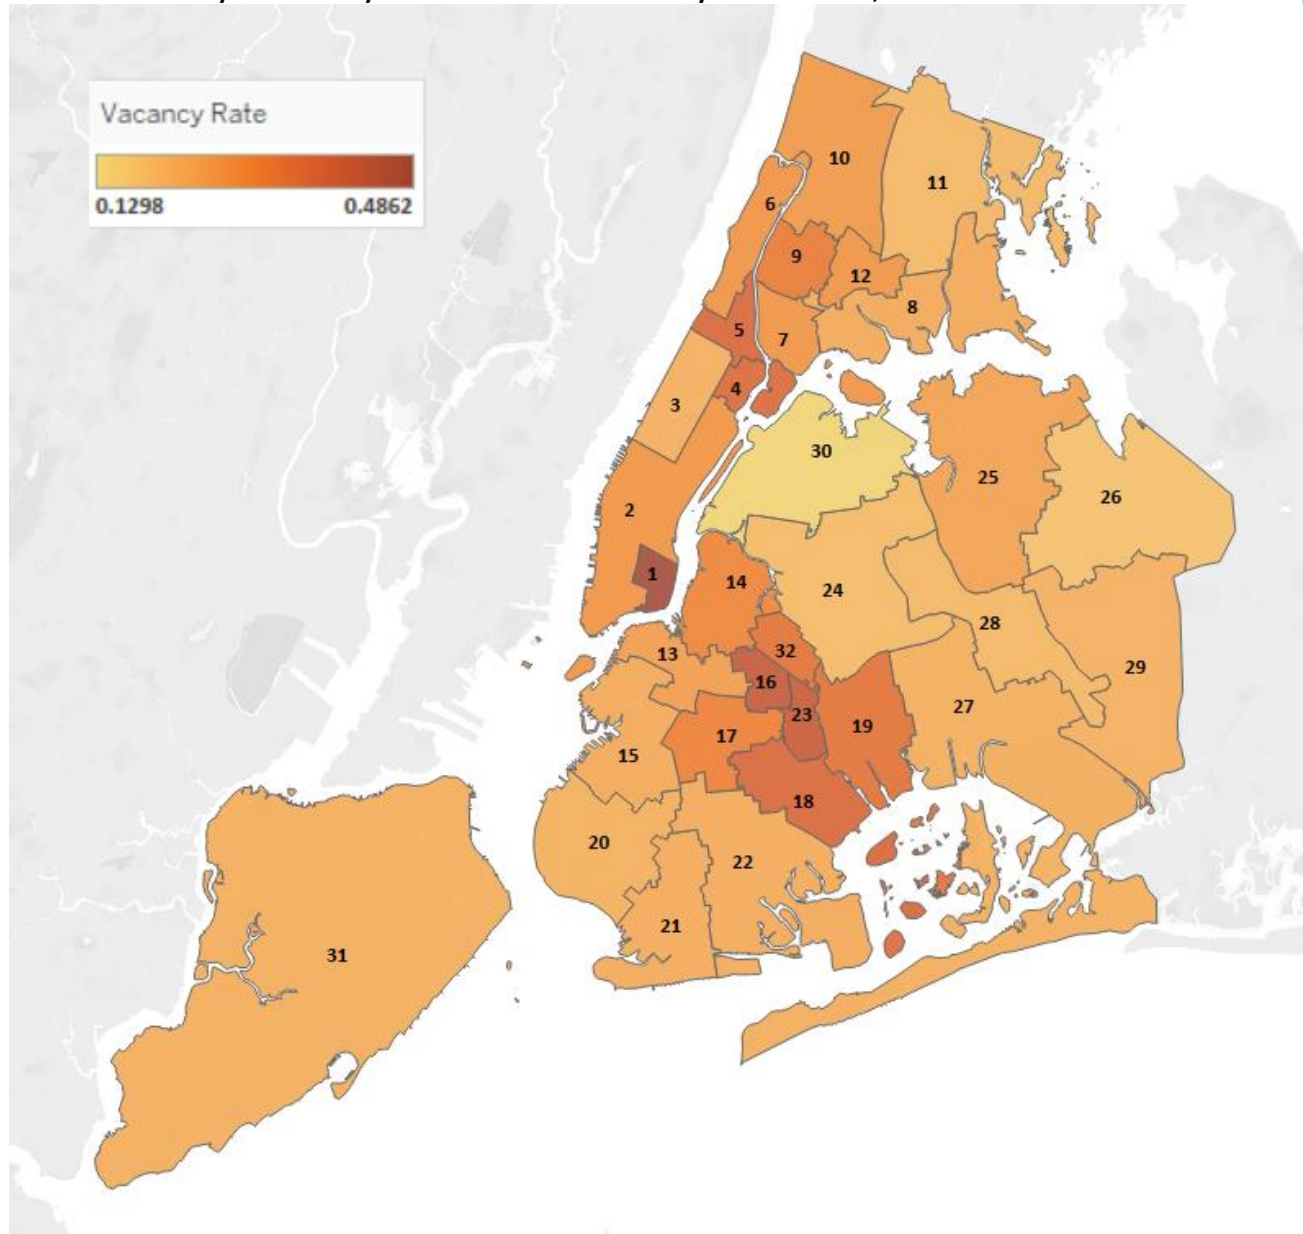

The placement of ECE seats and the high vacancy rates in the ECE system need to be addressed for both budgetary and policy reasons. The two maps below show the number of ECE providers and ECE seat vacancy rates per school district. Note that the vacancy rate map shows the overall vacancy

rates across the entire general education ECE system for each school district, it does not differentiate by age and seat type and does not include special education seats.

Number of Child Care Provider Sites per School District, Fiscal 2025

Enrollment Vacancy Rate of Early Childhood Education Seats by School District, Fiscal 2025

The data shows that school districts with a higher number of child care sites are more likely to have a lower vacancy rate, despite conversations about oversaturation and high competition among providers potentially leading to higher vacancy rates. For example, District 31 has the greatest number of providers (127) but also has one of the lowest vacancy rates at 21 percent. Inversely, District 16 has the fewest number of providers (22) but also has one of the highest vacancy rates at 42 percent.

The reasons for this are not necessarily clear. It may be that seat distribution is becoming better aligned and this is now capturing the demand in each district. It could also be that districts with fewer providers are also districts with less outreach and marketing efforts and so families are generally less aware of the seats that are available. The distribution of the type of seats that families are looking for, such as school day or extended day, varies across districts and may also play a factor in the vacancy rates. There are also districts that are exceptions, such as District 2, which has a high number of providers but also a higher-than-average vacancy rate compared to other districts. It is

also important to note that school districts are not redrawn to capture population changes, unlike council districts, and that, coupled with demographics differences, means that the number of children in the 0-5 age range varies significantly across different school districts.

On February 20, 2025, the Committee on Education held a hearing to discuss the potential closures of five ECE sites. DOE testified that one of the factors in considering non-renewal of these sites' leases was oversaturation of sites in the district. The vacancy rates and number of provider maps call into question the definition of oversaturation, as all five sites were in school districts on the lower end of the number of providers, from 22 providers in District 16 to 85 providers in District 27. The vacancy rate among these districts varies, from 21 percent in District 27 to 42 percent in District 16. This smaller sample of school districts follows the pattern seen in the City as a whole regarding vacancy rates and the number of providers. Further discussion on ECE leases can be found in the ECE Site Leases section of Budget Issues and Concerns.

Special Education Preschool. The \$55 million investment in Fiscal 2025 for additional preschool special education seats was a direct response to the growing need for these seats. The number of preschool age students with IEPs has grown to an average of 32,000 each year, from 25,935 in Fiscal 2022 and 30,000 in Fiscal 2023. With this investment, the Department was able to offer 730 additional special education preschool seats: 124 new integrated seats and 616 self-contained classroom seats. However, it is concerning that these funds were not included in the Fiscal 2026 budget.

At the end of January 2025, there were 360 special education preschool students waiting for seats in self-contained classes and 90 students waiting for seats in integrated classes. Additionally, 5,861 preschool special education students were waiting for at least one of their mandated services and 5,657 preschool students were receiving no services at all. By the end of February 2025, there were reportedly still 600 students waiting to be placed.

During a recent oversight hearing on January 30, 2025, the Department noted the barriers to providing complete services to special education preschool students. To improve operations for preschool special education, the Department testified that they would need to increase the number of evaluation teams and Committee on Special Education administrators, address staffing shortages for teachers and paraprofessionals, and hire more in-house staff to provide mandated services.

Delayed Payments to Providers. Delayed payments to ECE providers has been an ongoing issue for DOE. According to an analysis of Fiscal 2024 term and condition data, 41 providers had been paid less than they had invoiced for Fiscal 2024 as of the end of that fiscal year. As of February roughly \$78 million in payments for Fiscal 2024 invoices have been paid after the close of the fiscal year.

In Fiscal 2025, the Department has paid \$440.6 million in advances to childcare centers to date. An additional \$276 million has been paid out for invoices, for a total of \$716.6 million paid to providers as of February. There is a shortfall in DOE's staffing of positions that review ECE invoices. As of January 2025, DOE had 28 analysts for 38 budgeted positions that cover provider contracts and invoicing, with each having an average portfolio of roughly 60 provider sites. DOE has stated that the optimal caseload for each analyst would be roughly 30 provider sites.

ECE Site Leases. In January 2025, five ECE sites were notified that their leases would not be renewed for the following school year, leading to potential closures. This included four sites in Brooklyn, Nuestros Niños, Grand Street Settlement, Friends of Crown Heights and Fort Greene Settlement and one site in Queens, All My Children. The Department cited low enrollment numbers, high saturation of ECE centers in their respective districts and unfavorable lease negotiations. However,

the rationale to close these centers came under scrutiny in an Education Committee oversight hearing in February 2025. While the Department claimed that Nuestros Niños only had four students enrolled, the site actually had 96 students enrolled. Additionally, the DOE’s definition of high saturation is unclear, and all five of these sites had extended day seats, which are limited in the ECE system. One of the sites was one of only four extended day toddler sites in the school district.

After political and public backlash around the closures, the Department and the School Construction Authority (SCA) renegotiated these five leases to keep the sites open for at least one more school year. SCA testified that six ECE sites have leases which expire within the next two years. The Department testified that they would improve their communication process with sites that have expiring leases to help sites prepare for the outcome of negotiations.

Enrollment and Vacancy Rates. On February 20th, The Department testified that DOE has the capacity to serve approximately 140,000 children in ECE programs, while the system currently had 30,000 vacancies in Fiscal 2025. Data received from the Council’s term and condition on enrollment shows that the total capacity of the system, combining District and CBO sites with family care centers, shows a capacity of 136,602 seats with 34,526 vacancies across the system. This includes an enrollment of 57,684 for Pre-K and 44,267 for 3-K. When comparing to term and condition ECE enrollment data from May 2024, total Pre-K enrollment has dropped 12,117 and total 3-K enrollment has dropped by 4,673.

These are sharp decreases, but there are reasons to believe the data may be incomplete. When testifying at the February 20th hearing, DOE noted that of their 1,505 contracted ECE providers they have approved budgets for only 1,094 programs. Budget approval is necessary for a provider to move forward in the process of invoicing, which includes submitting current student enrollment and attendance records. This would mean that for over 400 of the contracted providers, their enrollment figures may not be up-to-date. In the term and condition data, 19 sites are listed as having no enrollment and 40 sites have vacancy rates above 80 percent.

By district, the vacancy rates differ quite dramatically, from 42 percent in Community School District 1, to just under 10 percent in Community School District 30. The district-level data does not include Family Care Center network provider enrollments.

Early Childhood Education Enrollment FY24-25		
Seat Type	Fiscal 2025 T&C Data	Fiscal 2024 T&C Data
General Education 3-K	37,951	41,221
Special Education 3-K	2,292	4,169
Family Childcare Center	4,024	3,550
Total 3-K Enrollment	44,267	48,940
General Education Pre-K	53,404	61,204
Special Education Pre-K	4,280	8,597
Total Pre-K Enrollment	57,684	69,801
Total Enrollment	101,951	118,741
<i>Source: City Council Term and Condition</i>		

In addition to enrollment data, the Department of Education also provided enrollment targets through a different term and condition. The table below compares DOE’s enrollment target with enrollment actuals citywide. Since the enrollment target data does not include Pre-K half-day seats or 3-K family childcare center seats, those seat types have been excluded from the enrollment actuals. The 3-K actuals are slightly behind the stated enrollment target while Pre-K enrollment actuals lag by over 10,000 seats compared to targets.

Enrollment Targets Versus Enrollment Actuals		
	Enrollment Target	Enrollment Actual
3-K	43,595	40,243
Pre-K	67,691	57,175
Total	111,286	97,418

Source: City Council Term and Conditions

Extended Day. The Council invested \$25 million in Fiscal 2025 to fund a second year of the ECE extended day pilot. As of February 2025, there are 60 sites operating within the pilot providing 2,283 seats. The Council pilot increases the number of available extended day seats in the ECE system. Programs must follow eligibility criteria for extended day seats and families must confirm eligibility through the MyCity portal, in addition to the MySchools application. However, since the additional extended day seats have not been baselined, providers cannot assume these extended day seats for the following school year. As a result, these additional extended day seats are not accounted for in the 3-K and Pre-K application process in the winter. Once funding is added in the budget, sites can opt into offering extended day seats and families can receive an extended day seat if they were not originally offered one in the application process.

Class Size Compliance. The State Class Size law, passed in 2022, dictates that all DOE classes must meet their class size caps by the 2027-2028 school year. The mandated caps are 20 students for kindergarten through 3rd grade classes, 23 students for 4th grade through 8th grade classes, and 25 for high school classes. The law requires that 40 percent of classes must meet their caps during the 2024-2025 school year. By the 2025-2026 school year, the Department must be in 60 percent compliance. According to DOE's Annual report on Class Size implementation released in November, 47 percent of classes met compliance, meaning DOE has satisfied the current year requirements but may struggle to meet the 60 percent compliance rate next school year. Additional funding is needed for Fiscal 2026 and the outyears to meet compliance mandates, as the Comptroller's office was unable to certify that the Department will meet compliance under the current expense and capital budgets.¹ While the School Construction Authority continues to add seats through capital projects, the Department will need to hire more teachers to fill classrooms to meet class size mandates. It is estimated that an additional \$168 million to \$214 million of expense dollars will be needed in Fiscal 2026 to meet compliance which would increase to between \$1.24 billion and \$1.38 billion in order to be fully in compliance in Fiscal 2028.

Headcount Budgeting. Though federal stimulus funding has almost entirely expired in Fiscal 2025, some of the headcount tied to that funding remains in DOE's budget, though it drops out in Fiscal 2026. Currently, the budgeted headcount for Fiscal 2026 is 1,819 lower than the current Fiscal 2025 budgeted headcount. These budgeted positions are associated with Pre-K (1,250 pedagogical positions and 473 non-pedagogical positions) and Categorical Programs (569 pedagogical positions and 74 non-pedagogical positions). City funding was increased to replace the federal funding that expired, but as this new funding is no longer tied to the budgeted positions, the headcount budget is now misaligned and difficult to analyze. In a similar vein, as City and State funding was added to replace the expiring stimulus funding, the headcount tied to these programs did not follow. For instance, when \$74 million in baselined State funding was added in the Fiscal 2025 Executive Budget for mental health staff, positions that had been formerly been covered by stimulus funding, it

¹ New York City Comptroller. (January 7, 2025). "Letter to New York Governor Kathy Hochul, State Senate Majority Leader Andrea Stewart-Cousins, and Assembly Speaker Carl Heastie re: Certification of Class Size Reduction Plan." <https://comptroller.nyc.gov/reports/letter-re-certification-of-class-size-reduction-plan/>

was without an associated headcount increase, despite the funding supporting 60 school psychologists and 440 social workers.

Contracts. DOE has the largest contract budget among all City agencies. DOE’s Fiscal 2026 contract budget totals \$10.8 billion, accounting for 32 percent of DOE’s Fiscal 2026 budget. The Department’s contract budget is made up of \$3.4 billion, or 31 percent, in contracts for Charter Schools, \$2.1 billion, or 21 percent, for contracts for payments to contract schools for students with disabilities, \$2.0 billion, or 19 percent, for contracts for student transportation, and the remaining \$3.2 billion, or 30 percent, funds a variety of contracts including Information Technology, school cleaning, professional development and Early Childhood Education sites at community-based organizations among others. DOE’s Fiscal 2026 Contract Budget includes funding for 6,362 contracts spread across 16 units of appropriations and 28 different contract types for services such as private schools, transportation, professional services, and social services.

Notably, transportation contracts, the majority of which were originally bid in the 1970s, have faced scrutiny from the Council, parents, teachers, advocates, and other stakeholders. There are currently 102 transportation contracts across 54 vendors that provide yellow bus services during the school year and summer programming for general education and special education students from preschool to high school. This includes 18 contracts for preschool transportation services, 15 non-legacy contracts, and 68 legacy contracts, including 17 contracts for summer services. Additionally, New York City Schools Bus Umbrella Services (NYCSBUS) has a contract with the Department to provide transportation services. The contracts comprise 7,852 routes for kindergarten to high school students during the school year coordinated by DOE. Summer routes and preschool routes are determined by vendors.

To address problems raised by families, including the inflexibility of services and not adequately accommodating students with disabilities, the Department would need to rebid contracts. The 68 legacy contracts include employee protection provisions (EPPs) that safeguard school bus workers’ wages based on seniority. Non-legacy contracts have been rebid without EPPs, as EPPs were struck down by a court order in 2017 and must be reinstated through State legislation. The necessity of EPPs paired with the City’s inability to include EPPs in future contracts without State legislation prevents the Department from rebidding legacy contracts. Rebidding contracts without EPPs may lead to a school bus worker strike. Current contracts severely limit the flexibility of student transportation services as needs have changed since they were originally awarded in the 1970s. Many students with disabilities rely on yellow bus services for transportation, but current contracts do not permit services after 3pm. This provision prevents students with disabilities, and other populations that rely on yellow bus services such as students in temporary housing, from fully participating in afterschool programming. While the Department spends 19 percent of the contract budget on student transportation services, the current transportation contracts undermine the quality of service that students and families experience. 84 contracts will expire at the end of June 2025 but will most likely be extended without changes if State legislation has not been passed to ensure EPPs in future contracts.

Federal and State Budget Risks

Federal Funding. On January 27, 2025, the Trump administration issued a directive to pause federal loan and grant spending. This directive was quickly rescinded two days later, but an executive order issued by the President to review funding remains in effect. The outcome of the executive order is currently uncertain. The Preliminary Plan includes approximately \$2.3 billion of federal funding for DOE in Fiscal 2025 and \$2.1 billion for Fiscal 2026. If the City is unable to collect this federal funding, DOE’s budget could have a shortfall that would need to be resolved in a future financial plan.

The largest portion of federal funding in DOE's Fiscal 2026 budget is Title I funding, providing \$685.9 million in Fiscal 2026. Title I funding is provided to schools in which 40 percent of their students come from low-income families. Another significant federal funding stream is the Individuals with Disabilities Education Act which totals \$290.8 million in Fiscal 2026.

Additionally, there is \$587.9 million for school food programs, which comprises the majority of DOE's school food budget. A majority of this federal funding is provided by the United States Department of Agriculture. The largest school food program is free and reduced-price lunch, which receives \$423 million in federal funding. Additionally, there is also funding for school breakfast programs and summer food programs. The Department also receives \$70.7 million in Head Start funding as a direct grantee, in addition to the Head Start funding that goes directly to providers, and \$125 million in Community Block Grant that support Early Childhood Education programs.

On February 14, 2025, the U.S. Department of Education released a letter to educational institutes across the country directing the end of Diversity, Equity and Inclusion programs or distributions of "benefits or burdens based on race", citing a 2023 Supreme Court as evidence that these programs are unlawful². The letter stipulates that schools and institutions that do not comply "face potential loss of federal funding." The exact repercussions of the federal government's new stance on these issues and its impact on federal funding flowing to DOE are undetermined at this time.

Similarly, the House Republicans passed a budget resolution on February 25th that calls for cutting \$330 billion in Education and Workforce spending over 10 years, though the intended programs and targets are not detailed.

State Foundation Aid Formula. The majority of State funding for school districts is allocated through the Foundation Aid Formula. Last year, Governor Hochul announced that the Fiscal 2025 State budget would include \$2 million to fund a report on recommendations to change the State Foundation Aid Formula by the Rockefeller Institute of Government (Rockefeller). In December 2024, Rockefeller released the report, which discussed a range of recommendations including updating census data, recalculating the base pupil amount, and adjusting the Regional Cost Index (RCI).

In the Governor's Fiscal 2026 Executive Budget, the Governor made two changes to the Foundation Aid Formula (Formula). The Fiscal 2026 Executive Budget formula utilizes updated census information, replacing 2000 census data to calculate poverty rates. Additionally, the Formula expands the definition for the economically disadvantaged student count, replacing the Free and Reduced-Price Lunch (FRPL) count. The economically disadvantaged student count includes students who receive economic assistance, including but not limited to FRPL, Supplemental Nutrition Assistance Program, and foster care.

The changes in the Formula would result in New York City receiving \$347 million less than originally projected in Foundation Aid, according to projections by the Mayor's Office of Management and Budget (OMB) and DOE. While the Governor's Executive Budget includes a \$593 million increase in Foundation Aid when compared to the level of Fiscal 2025 Foundation Aid, OMB and DOE project that there would have been an increase of \$940 million if the Formula had not been adjusted. The final State Foundation Aid Formula will be determined once the State's Fiscal 2026 Enacted Budget is passed.

It should be noted that the Formula did not include any changes related to how the specialized populations such as students in temporary housing (STH), students with disabilities or English Language Learners (ELLs) are weighted. During the 2023-2024 school year, 146,000 City students

experienced homelessness², 185,363 students had an IEP³ and 174,000 students were enrolled as ELLs⁴.
