## Program to Eliminate the Gap Overview

The Program to Eliminate the Gap (PEG) is the result of city agencies reexamining internal processes and policies, using resources efficiently, and re-estimating expenses. This publication is a compilation of PEG initiatives implemented by city agencies.

### PEG Classifications

PEG initiatives reduce the burden on city funded dollars, directly contributing to closing the “gap” between expenses and revenues and are classified by funding type.

There are five broad categories of PEG initiatives:

- **Efficiency** – Active changes to agency practices that improve the city’s finances without reducing service levels. This can be achieved by lowering spending, optimizing grant claiming, or increasing revenue collection. This includes hiring freeze savings and vacancy reductions.
- **Expense Re-estimate** – Less than expected spending on a program due to delay or underspending (lower than anticipated costs).
- **Revenue Re-estimate** – Revenue that did not require active agency efforts, either through grant claiming that results in a funding shift or an increase in city funds revenue.
- **Service Reduction** – Expense savings from scaling back programs, resulting in a decrease of services provided to the public.
- **Debt Service** – Lower than expected cost of debt service expenditures.

**I.**
