### **117-431**

#### **Design standards for pedestrian circulation spaces**

(a) Sidewalk widening

A sidewalk widening is a continuous, paved open area along the #front lot line# of a #zoning lot# at the same elevation as the adjoining sidewalk and directly accessible to the public at all times. A sidewalk widening shall meet the following requirements:

(1) Dimensions

A sidewalk widening shall have a width no less than 5 feet nor greater than 10 feet measured perpendicular to the #street line#, and shall be contiguous along its entire length to a sidewalk.

(2) Permitted interruptions

Only under the following conditions shall any interruptions of the continuity of a qualifying sidewalk widening be permitted.

(i) A sidewalk widening may be overlapped by a corner circulation space or a building entrance recess area that permits uninterrupted pedestrian flow.

(ii) An off-street subway entrance may interrupt a sidewalk widening, provided such an entrance is located at a #side lot line# or is located at the intersection of two #street lines#.

(iii) A sidewalk widening may be overlapped by the queuing space of a relocated subway entrance, provided that the queuing space for the entrance leaves a 5 foot uninterrupted width of sidewalk widening along the entire length of the queuing space.

(iv) A sidewalk widening may be interrupted by a driveway that is located at a #side lot line#. The area occupied by the driveway, up to the width of the sidewalk widening, may be counted towards meeting the pedestrian circulation space requirement, provided that there shall be no change of grade within the area of the sidewalk widening.

(3) Permitted obstructions

A sidewalk widening shall be unobstructed from its lowest level to the sky except for temporary elements of weather protection, such as awnings or canopies, provided that the total area (measured on the plan) of such elements does not exceed 20 percent of the sidewalk widening area, and that such elements and any attachments thereto are at least 8 feet above the #curb level#, and that any post or other support for such element or any attachment to the support has a maximum horizontal dimension of 6 inches.

(4) Specific prohibitions

No #street# trees are permitted on a sidewalk widening. No vehicle storage, parking or trash storage is permitted on a sidewalk widening. Gratings may not occupy more than 50 percent of the sidewalk widening area nor be wider than one half the width of the sidewalk widening.

(5) Special design treatment

When one end of the sidewalk widening abuts an existing #building# on the #zoning lot# or an existing #building# on the #side lot line# of the adjacent #zoning lot#, design treatment of the termination of the sidewalk widening is required to smooth pedestrian flow. The portion of the sidewalk widening subject to design treatment, hereinafter called the transition area, shall not extend more than 10 feet along the sidewalk widening from its termination.

The transition area shall be landscaped and the paved portion shall have a curved or diagonal edge effecting a gradual reduction of its width over the length of the transition area to no width at the point of the sidewalk widening termination. The unpaved portion of such landscaped treatment shall not exceed 50 percent of the transition area and shall be considered a permitted obstruction.

(b) Corner circulation space

A corner circulation space is a small open space on the #zoning lot# of a #development# or #enlargement#, adjoining the intersection of two #streets#, at the same elevation as the adjoining sidewalk or sidewalk widening and directly accessible to the public at all times. A corner circulation space shall meet the following requirements:

(1) Dimensions

A corner circulation space shall have a minimum area of 200 square feet, a minimum depth of 15 feet measured along a line bisecting the angle of intersecting #street lines#, and shall extend along both #street lines# for at least 15 feet but not more than 40 feet from the intersection of the two #street lines#.

(2) Obstructions

A corner circulation space shall be clear of all obstructions, including, without limitation, door swings, building columns, #street# trees, planters, vehicle storage, parking or trash storage. No gratings except for drainage are permitted.

(3) Building entrances

Entrances to ground level ~~#uses#~~ are permitted from a corner circulation space. An entrance to a building lobby is permitted from a corner circulation space, provided that the entrance is at no point within 20 feet of the intersection of the two ~~#street lines#~~ which bound the corner circulation space.

(4) ~~Permitted overlap~~

~~A corner circulation space may overlap with a sidewalk widening.~~

(e) ~~Building entrance recess area~~

~~A building entrance recess area is a space which adjoins and is open to a sidewalk or sidewalk widening for its entire length and provides unobstructed access to the building's lobby entrance. A building entrance recess area shall meet the following requirements.~~

(1) ~~Dimensions~~

~~A building entrance recess area shall have a minimum length of 15 feet and a maximum length of 40 feet measured parallel to the #street line#. It shall have a maximum depth of 15 feet measured from the #street line#, and if it adjoins a sidewalk widening shall have a minimum depth of 10 feet measured from the #street line#.~~

(2) ~~Obstructions~~

~~A building entrance recess area shall either be completely open to the sky or completely under an overhanging portion of the #building# with a minimum clear height of 15 feet. It shall be free of obstructions except for building columns, between any two of which there shall be a clear space of at least 15 feet measured parallel to the #street line#. Between a building column and a wall of the #building# there shall be a clear path at least 5 feet in width.~~

(3) ~~Permitted overlap~~

~~A building entrance recess area may overlap with a sidewalk widening or a corner circulation space.~~

## 117-44

#Developments# or #enlargements# on Blocks 1, 2 or 3, identified in Appendix B (Court Square Subdistrict Plan Map and Description of Improvements) of this Chapter, containing at least 70,000 square feet of #floor area# on #zoning lots# of at least 10,000 square feet of #lot area# shall provide mandatory subway improvements as described in paragraph (a) for Block 1, paragraph (b) for Block 2 and paragraph (c)(1) for Block 3 in Appendix B.

In addition, on # Block # 3, any #development# or #enlargement# containing at least 300,000 square feet of total #floor area# or any #development# or #enlargement# on a #zoning lot# of at least 30,000 square feet of #lot area# shall provide all the mandatory subway improvements for the # block #, as described in paragraphs (c)(1) and (c)(2) for Block 3).
